## LCB

## Backstopping Ball Bearing Supported, Sprag Clutches

The Model LCB-200 and 400 were designed to economically meet the problem of windmilling in fan applications.

The Model LCB-200 and 400 are economical low torque clutches which can accommodate a range of shaft diameters between $1-7 / 8$ " and 5 ".

These clutches can be installed on vertical or horizontal fan shafts without the use of a key. These clutches are maintenance free and easy to install.

The Model LCB-201 was designed to mount onto "QD" \& "TL" style bushing/ connections.

For LCB-400 Flange Adapter Accessory to be used for easy mounting onto "QD" \& "TL" style bushing/connections.
